Internet is used to listen and learn about music. It is also used to watch video and play games.

2 What is an Email? Explain Email Header and message part in detail.

Email Full form is Electronic Mail

Email is a method of exchanging messages between people using electronic devices.

=> Header Part:

Each message has exactly one header, which is structured into fields such as From, To, CC, Subject, Date.

In the process of transporting email message between pr systems.

SMTP communicates delivery parameters and information using header fields.

The header is separated from the body by a blank line.

Header contains control information and data about the message.

=> Message Body:

The email body is the main part of an email message.

Body contains the message's text, images and other data.

The body contains the message, as unstructured text, sometimes containing a signature block at the end.

The body is usually a free-form field that lets you compose without restriction.

The internet email standard does not limit the size of an email's body text.
